

GT3000

Pursuing ultimate versatility of installation

Genmega introduces the GT3000 series through-the-wall ATM. Designed and intended as a true through-the-wall machine, the GT3000 retains all the features and options of a retail floor model ATM in a small, compact weather resistant chassis, perfect for tight spaces, Kiosks or anywhere location space is valuable.

The GT3000 uses a 7" high-resolution wide-screen LCD, 2" receipt printer and can be ordered with a fixed cassette or rear-load removable cassette dispenser. There is also an optional Rear service-panel to provide secure loading and management functions.

While the small footprint TTW chassis is all new, the GT3000 series ATM uses existing Genmega components, so service and maintenance remain easy and familiar. The GT3000 provides an economical through-the-wall solution.
